

TAXIRAIL

TAXIRAIL is a bold new intelligent rail transport, consisting in autonomous railpods.

The main target of **TAXIRAIL** is to re-open or maintain secondary railway network with good profitability for the operator and attractive service for the customers.

TAXIRAIL provides a versatile and profitable solution thanks to its on-demand and platooning capability according to the needs.

TAXIRAIL's hybrid-electric powered modules provide carbon neutral exploitation thanks to a bio-gas fuelled engine. Door opening, lighting, heating, air conditioning and entertainment are provided by solar panels.

TAXIRAIL's active axles and suspensions allow smooth handling, safety and performances even on difficult rail tracks.

TAXIRAIL is continually connected to supervisors and passengers in order to provide real time information about traffic and absolute safety.

ABOUT THE COMPANY
